Summary

Full stack developer with 2 years at Flashaid, building payment and insurance products using TypeScript, React, Node.js, and PostgreSQL. Built and launched Trailgrad, an end-to-end interview preparation platform with guided practice, AI voice interviews, and a shared coding editor. AWS Certified Solutions Architect – Associate.

Work Experience

Software Developer Aug 2024 – Jul 2026
Flashaid Mumbai, India

- Developed backend APIs, React frontend, and PayU integration for **SmartCollect**, Flashaid's payment collections platform for EMI schedules, mandates, and UPI, processing **2,000+ payments a month** through PayU and Decentro.
- Partnered with business stakeholders to translate their requirements into production features for Flashaid's retail and group insurance products, which generate **₹2 crore+ (~$240K)** in annual revenue.
- Shipped features from requirements to release, covering API design, frontend work, and payment integrations, and tracked tasks in Jira.
- Integrated **University Living** as a partner and helped onboard **18 institutes** to offer its student accommodation services through Flashaid.
- Launched **Student Total Protect**, an insurance and fee-protection product for students, offered through **12 partner institutes**.

Technical Skills

Languages: TypeScript, JavaScript, Java, SQL
Frameworks and Libraries: React, Next.js, Node.js, Tailwind CSS, Zod, React Testing Library
Data and Systems: PostgreSQL, Redis, Prisma, REST APIs, WebSockets, Payment Gateways
AI Engineering: LLM Integration and Evaluation, RAG, Voice AI, Gemini, Groq, Claude Code, OpenAI Codex
Cloud and Tools: AWS, Vercel, Docker, Git, Jira

Projects

Trailgrad – Technical Interview Preparation Platform 2026
trailgrad.com

- Built and launched **Trailgrad**, an end-to-end interview preparation platform for software engineers, with guided practice in **5 domains**, voice and text mock interviews across **5 tracks**, resume feedback, peer help, and a scored report after every session.
- Designed the AI interviewer to adjust to each candidate's role, experience, and resume, and to follow up on their earlier answers the way a real interviewer would.
- Created a shared coding editor with Monaco, Yjs, and LiveKit, with code running in **5 languages** inside isolated Judge0 and Vercel sandboxes.
- Kept live interviews responsive by giving the voice conversation to Gemini Live, next-step decisions to Groq, and answer grading to Gemini Flash, with automatic failover between providers.
- Made interview state safe across serverless instances, using PostgreSQL optimistic locking, Redis leases, and idempotency keys to stop duplicate processing and conflicting updates.

Education

B.Tech in Electronics and Computer Science 2020 – 2024
Pillai College of Engineering, Panvel, Navi Mumbai CGPA: 9.24 / 10

Certifications and Awards

AWS Certified Solutions Architect – Associate Jul 2026
Amazon Web Services Valid until Jul 2029
Emerging Star Award 2024
Flashaid – recognized within 3 months of joining for engineering work and product delivery
